The Rules

If you speak Japanese, you must **move back 3 spaces.**
Go down on a snake.

When you move to a space, each member of your group must ask a question.

If you land on a ladder, answer the questions, **and then move up.** Next player.

If you land on a snake's head, answer the questions, **and then move down.** Next player.

To finish you must throw the exact number to land on the winner star. If the number is too big, you must count back from the winner star. **Go down on a snake.**
