## Questionnaire - What kind of student?

### Score 10 Very good

You are a very good student and contribute to the classes. Any teacher would be happy to have you in the class and will reward you with the high grades you deserve. You will achieve many things in your future.

### Score 11 ~ 15 Good

You are a good student, but you have a few weak points that could be improved. Work on these problems and your grades will get better. To change your way of thinking now, could change your future in a big way. If you do something, always do your best!

### Score 16 ~ 20 Average

As long as Mum and Dad will keep paying for it, what's the problem? If you are lucky, your future may come good, but ...

### Score 26 ~ 30 Sad Waster

There is not much hope for you as a student. You are just pretending. Perhaps you should stop wasting everybody's time and money and get a job at a convenience store. At least in that way, you would contribute something to society.
